

CLAIMS

What is claimed is:

1. A pipe holder, comprising:
 - a body member, wherein the body member defines an opening proximate a first end of the body member; and
 - a support member connected to and extending away from the body member.
2. The pipe holder of claim 1, wherein the pipe holder is fabricated from a metal.
3. The pipe holder of claim 1, wherein the pipe holder is fabricated from a plastic.
4. The pipe holder of claim 1, wherein the opening is a circular-shaped opening.
5. The pipe holder of claim 1, wherein the body member defines a second opening.
6. The pipe holder of claim 5, wherein the second opening is a threaded opening.
7. The pipe holder of claim 5, wherein the second opening is positioned between the support member and a second end of the body member.
8. The pipe holder of claim 1, wherein the body member further includes a hook portion proximate a second end of the body member.

9. The pipe holder of claim 1, wherein the support member extends perpendicularly from the body member.
10. The pipe holder of claim 1, wherein the support member defines a third opening.
11. The pipe holder of claim 11, wherein the third opening is a threaded opening.
12. The pipe holder of claim 1, wherein the support member includes a hook portion proximate a second end of the support member.
13. A ladder, comprising:
 - first and second side rails;
 - a crossmember connected to the first and second side rails; and
 - a pipe holder connected to the crossmember, wherein the pipe holder includes:
 - a body member, wherein the body member defines an opening proximate a first end of the body member; and
 - a support member connected to and extending away from the body member.
14. The ladder of claim 13, wherein the pipe holder is removeably connected to the crossmember.
15. The ladder of claim 14, wherein the pipe holder is removably connected to the crossmember with a set screw.

16. The ladder of claim 14, wherein the pipe holder is removably connected to the crossmember with an elastic hook.

17. The ladder of claim 13, wherein the pipe holder is fixedly connected to the crossmember.

18. The ladder of claim 17, wherein the pipe holder is fixedly connected to the crossmember with a fastener.

19. The ladder of claim 13, wherein the pipe holder is formed integral with the crossmember.

20. A ladder, comprising:

first and second side rails;

a crossmember connected to the first and second side rails; and

a pipe holder connected to the crossmember, wherein the pipe holder includes:

 a body member, wherein the body member includes means for allowing a length of pipe pass therethrough; and

 a support member connected to and extending away from the body member.
